

Planet eStream Directory Integration Summary

Below is a grid providing an overview of the directory integrations available with Planet eStream and associated capabilities.

	Local Active Directory	Microsoft ADFS	Microsoft Azure AD	Google Login	SAML2/ Shibboleth
Local Solution					
Manual Authentication	✓	✓ ***	✓ ***		
Single Sign On	✓ *	✓	✓	✓	✓
Directory Members Lookups	✓	✓ **	✓	✓ ***	✓ ***
Cloud Solution					
Manual Authentication	✓	✓ ***	✓ ***		
Single Sign On		✓	✓	✓	✓
Directory Members Lookups	✓ ***	✓	✓	✓ ***	✓ ***

Manual Authentication

Users will be able to authenticate using the login form, the users credentials will be validated against the directory.

Single Sign On

Users will be able to authenticate using the identity provider's login form, if previously authenticated user will be logged in automatically

Directory Member Lookups

Administrators will be able to query the directory for users and groups to add as members of Planet eStream schemas

* Implements Automatic Windows Authentication. Users accessing platform from outside of local network will be required to login manually

** Users and groups can be added manually to Schemas in Planet eStream

*** May require connection to the AD/LDAP server. If on a cloud installation this is highly recommended to be a secure connection.
