

Screen Loops

You can think of Screen Loops as playlists of completed Screen Designs, which each contain multiple different content panels. Once you have created a Screen Loop you can add it a schedule as an alternative to individual Screen Designs.

Step 1: Creating Screen Loops

To manage Screen Loops, select **Screen Loops** from the top navigation of the digital signage.

Select **New** to create a new Screen Loop or **Open** to modify an existing Screen Loop.

What is a Screen Loop?

Screen Loops allow users to create a playlist of individual Screen Designs. It is recommended to use them to schedule multiple Screen Designs in one go, instead of laboriously creating individual schedules. Each Screen Design is set a duration to show for before moving onto the next item.

The schedule options within the Screen Loop can also be used as a simple scheduling tool in comparison to normal schedules.

Screen Loops can also be scheduled via a normal schedule and also set as the default content for Players and Zones

After selecting **New**, give your Screen Loop a name, allocate it to a Publishing Policy and set the privacy options.

Step 2: Adding screens

Once you've created the Screen Loop you can add individual screens to it by selecting **Add Items** and searching for any screens that you would like to add to the loop.

The default period in minutes that each screen is shown for in the screen loop. This will be applied to all screens in list with an individual duration of 0.

Add Item

Total Duration: 00:00

Schedule Options

Commence	Expire
<input type="text" value="dd/mm/yyyy"/>	<input type="text" value="dd/mm/yyyy"/>
<input type="text" value="00"/>	<input type="text" value="00"/>
<input type="text" value="00"/>	<input type="text" value="00"/>

[Clear Dates](#)

Show on Days of Week

Click on the screens that you'd like to add, and they will be selected, you can then press close and they'll be added to your Screen Loop.

You can change the order that screens are displayed in by simply dragging and dropping using the up and down arrows.

Step 3: Duration and scheduling

Each individual item in the loop will show for a default interval of 5 minutes which is set with the Screen Loop Interval at the top. You can change the default interval by typing in a new duration.

Screen Loop Interval

The default period in minutes that each screen is shown for in the screen loop. This will be applied to all screens in list with an individual duration of 0.

You're also able to change the duration for screens on an individual basis. Select each screen in the list and modify scheduling using **Scheduling Options**.

As well as setting the duration in minutes and seconds, you can specify which days of the week screens in the loops will be shown on and when they commence and expire. Commence and expiry can be configured on a day or time basis, or both.

Schedule Options

Commence	Expire
<input type="text" value="dd/mm/yyyy"/>	<input type="text" value="dd/mm/yyyy"/>
<input type="text"/>	<input type="text"/>
<input type="text"/>	<input type="text"/>

[Clear Dates](#)

Show on Days of Week

Sunday	Monday	Tuesday	Wednesday	Thursday	Friday
<input type="checkbox"/>					
Saturday					
<input type="checkbox"/>					

Please note, all days unticked is the same as having all days ticked.

Duration

Minutes	Seconds
<input type="text" value="1"/>	<input type="text" value="0"/>

Once you have configured your screen loop, press **Save**. You can then add it to a schedule or as default signage content for Signage Player or Zone.
