

Linking and Embedding

Planet eStream content can be shared into other online platforms and resources using the sharing options available to you on each media item. You can also share chapters and quizzes in the same ways.

To begin sharing an item, first locate the item and open it. You can access the **Share** options from the details tab.

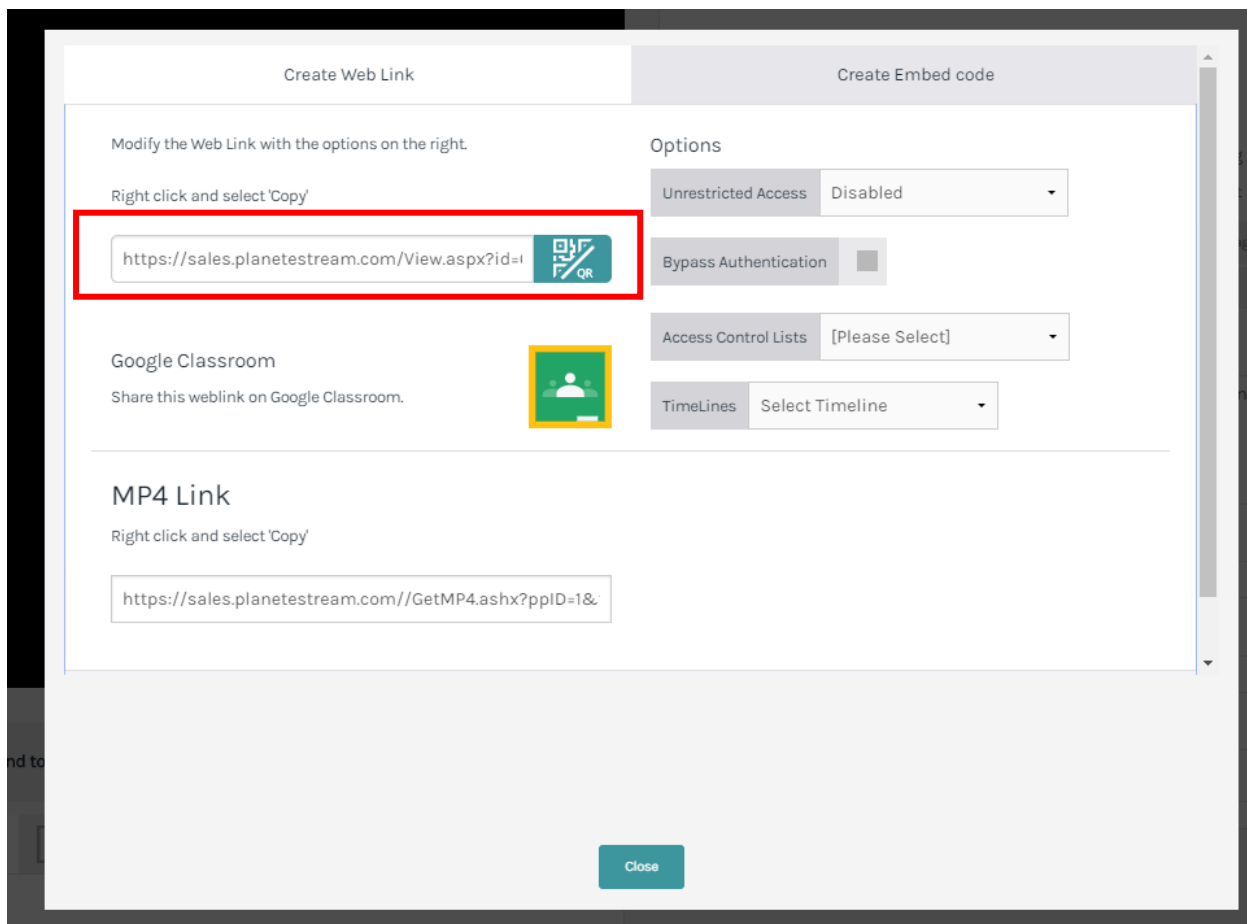

Share by Web Link

Web links can be used to share a link to a piece of content with a group of users who will then typically log-in to Planet eStream to view it back. It is commonly used for sharing via email or instant messaging applications.

After accessing **Share** from the details tab of the piece of media you want to share, select **Share by Web Link**.

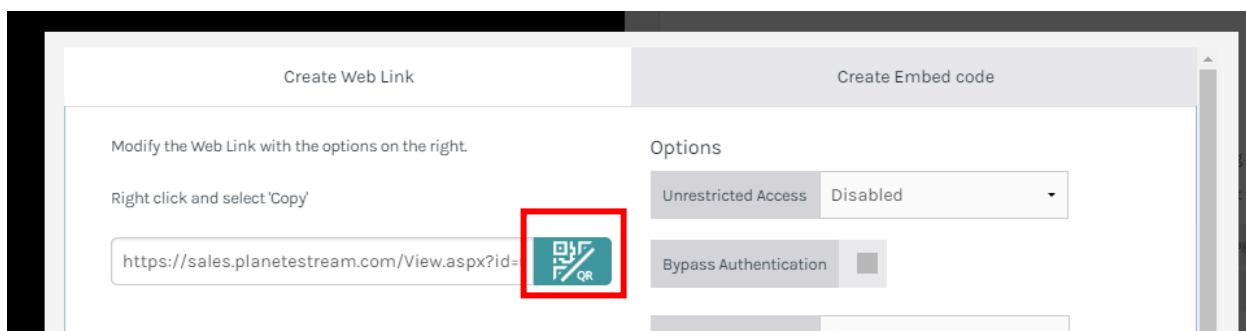

The screenshot displays the Planet eStream user interface. At the top, there is a navigation bar with icons for Categories, View, Create, and Tools. Below this is a search bar and a user profile icon. The main content area is divided into two sections. On the left is a large black video player. On the right is the 'Details' tab for a media item titled 'The Secret Science of Pop'. The details section includes a star rating, a public status indicator, and various action buttons. A red box highlights the 'Share' button, which has a dropdown menu open showing 'Share by Web Link' and 'Share by Embedding'. Below the details section, there are fields for 'Broadcast Date' (24/07/2017 21:00), 'Broadcast Channel' (BBC Four), and 'Staff Only CPD' (No). At the bottom of the interface, there are buttons for 'Send to Signage', 'Comments', and 'Notes'.

You will then be presented with the following window, which will display the share link for the video.

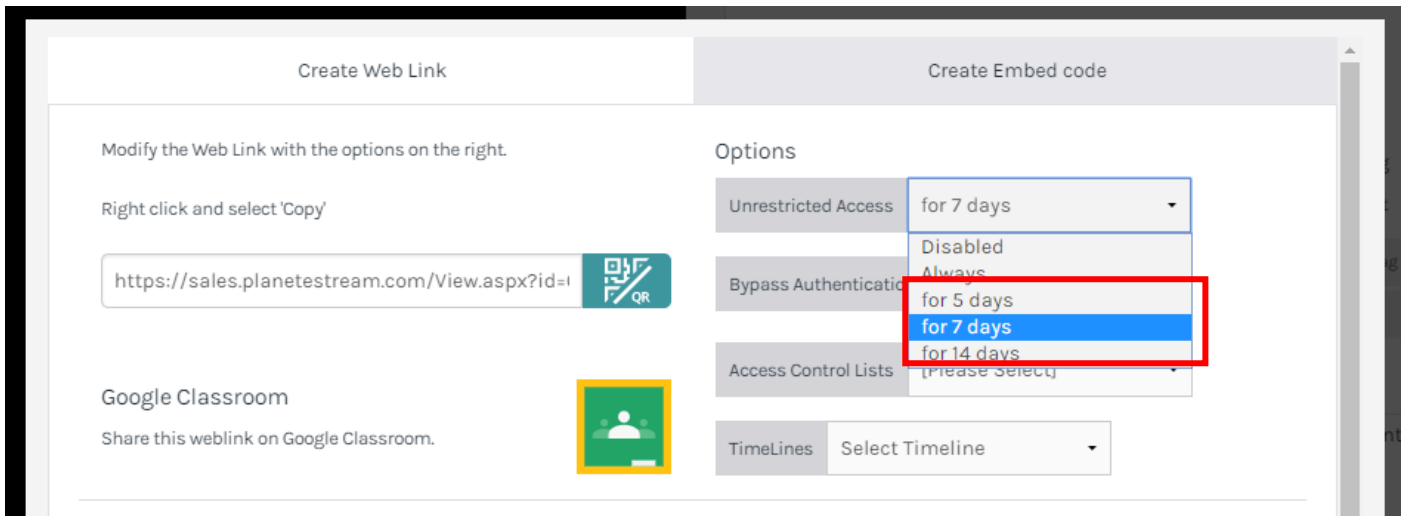

If you would like to add that link into a worksheet or simply distribute to your class, you can just copy the share link and paste it into your desired location.

You can also generate a QR Code that you can also distribute by clicking on the **QR** icon.

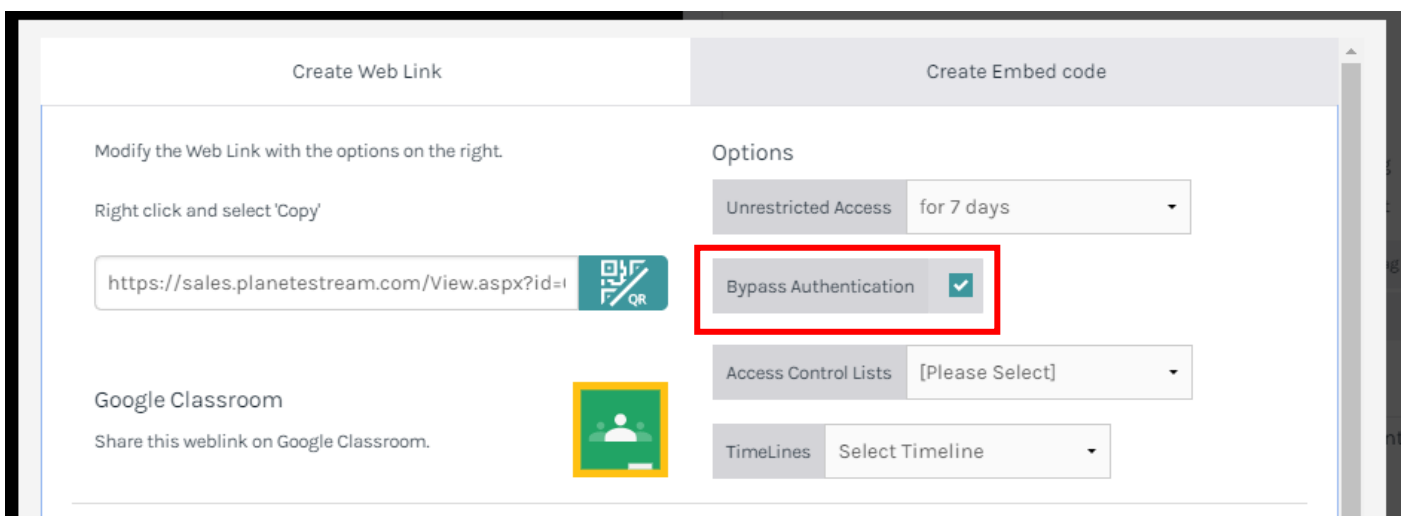

You also have a couple of other options for your share link which are entirely permission based, so not all users will have access to these.

Firstly, you may have the ability to create a link with **Unrestricted Access** link, which can be shared without the recipient being asked to log into eStream. This makes it much easier to send out links to external recipients, such as parents or invigilator. To do this, begin by choosing an unrestricted access expiry option, for example 7 Days. This allows for the link to only be available for a set period before becoming unavailable.

Once you have set the duration, tick the check box marked **Bypass Authentication**. After applying this just copy and paste the link as usual.

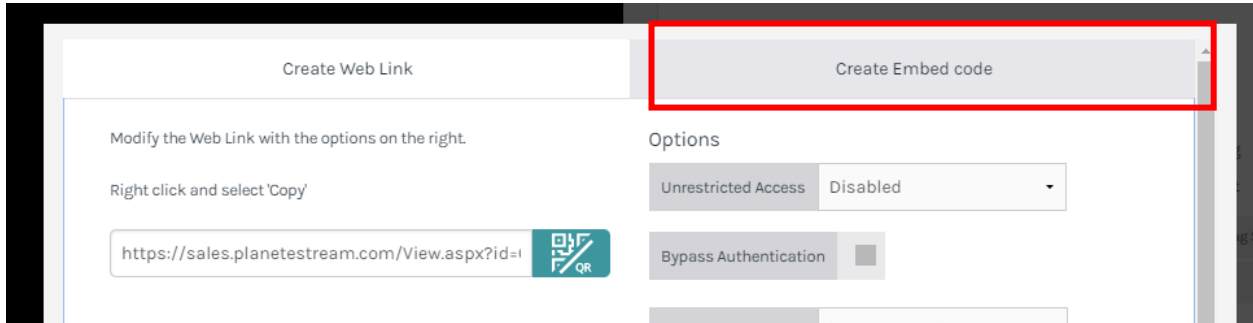

If you have created Access Control Lists or any Quiz TimeLines on your video, these can be shared in the same way by selecting them from the relevant drop-downs.

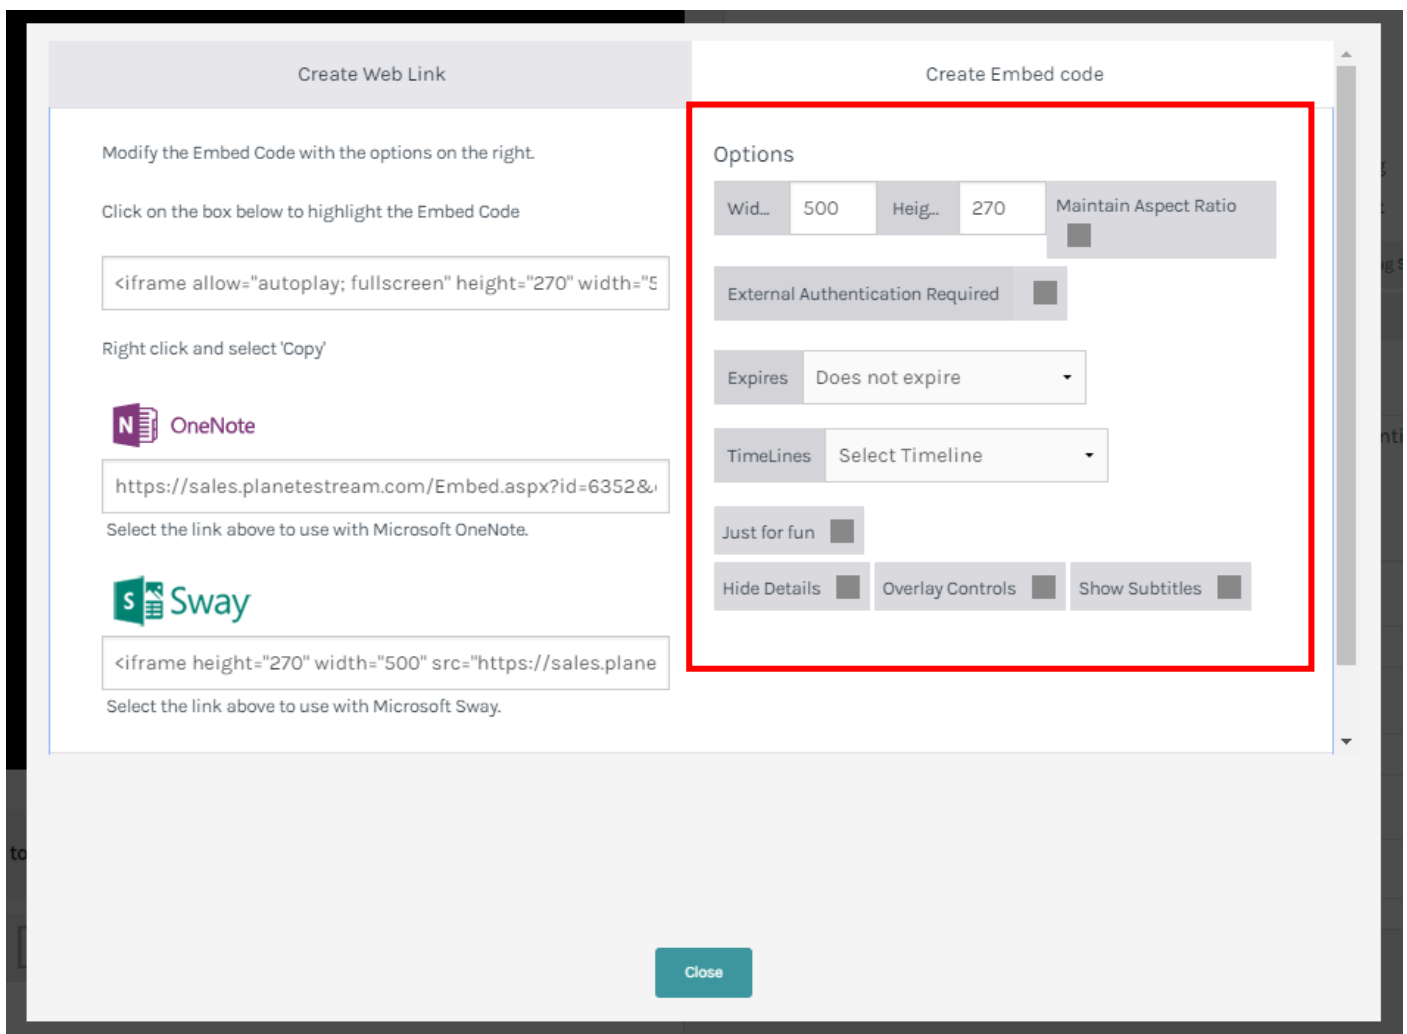

Share by Embedding

Embedding will display the video player in a third-party resource, rather than linking the recipient back to Planet eStream. This is commonly used in VLE or LMS systems, websites and intranets.

To create an embed code for your content, click **Create Embed code** at the top of the share window or select **Share by Embedding** from the share options.

You will be able to access several different options to modify the embed, including expiry duration, subtitles and size. By default, embeds will be open and viewable by anyone. To alter this to ensure viewers will need to log in, then you can just tick the check box marked **External Authentication Required**.

As soon as you have chosen your desired settings you can take your embed code by copying the code and pasting into your other resource. Your external resource will need to support embeds for this to work.

Create Web Link

Create Embed code

Modify the Embed Code with the options on the right.

Click on the box below to highlight the Embed Code

```
<iframe allow="autoplay; fullscreen" height="270" width="500" src="https://sales.planetestream.com/Embed.aspx?id=6352&..." />
```

Right click and select 'Copy'

OneNote

<https://sales.planetestream.com/Embed.aspx?id=6352&...>

Select the link above to use with Microsoft OneNote.

Sway

```
<iframe height="270" width="500" src="https://sales.plane..." />
```

Select the link above to use with Microsoft Sway.

Options

Wid... 500 Heig... 270 Maintain Aspect Ratio

External Authentication Required

Expires Does not expire

TimeLines Select Timeline

Just for fun

Hide Details Overlay Controls Show Subtitles

You are also able to embed/share chapters using the same methods as applied above. To share chapters, simply locate the chapters within a selected video and hit **Share**; it is the bottom icon of the three on the right-hand side.
