

SharePoint

For Planet eStream users who also use a local SharePoint it is very easy to add content from your Planet eStream site to your SharePoint system.

Step 1: Accessing eStream Content

First select **Edit** and **Insert**. You will see a **Planet eStream** option.

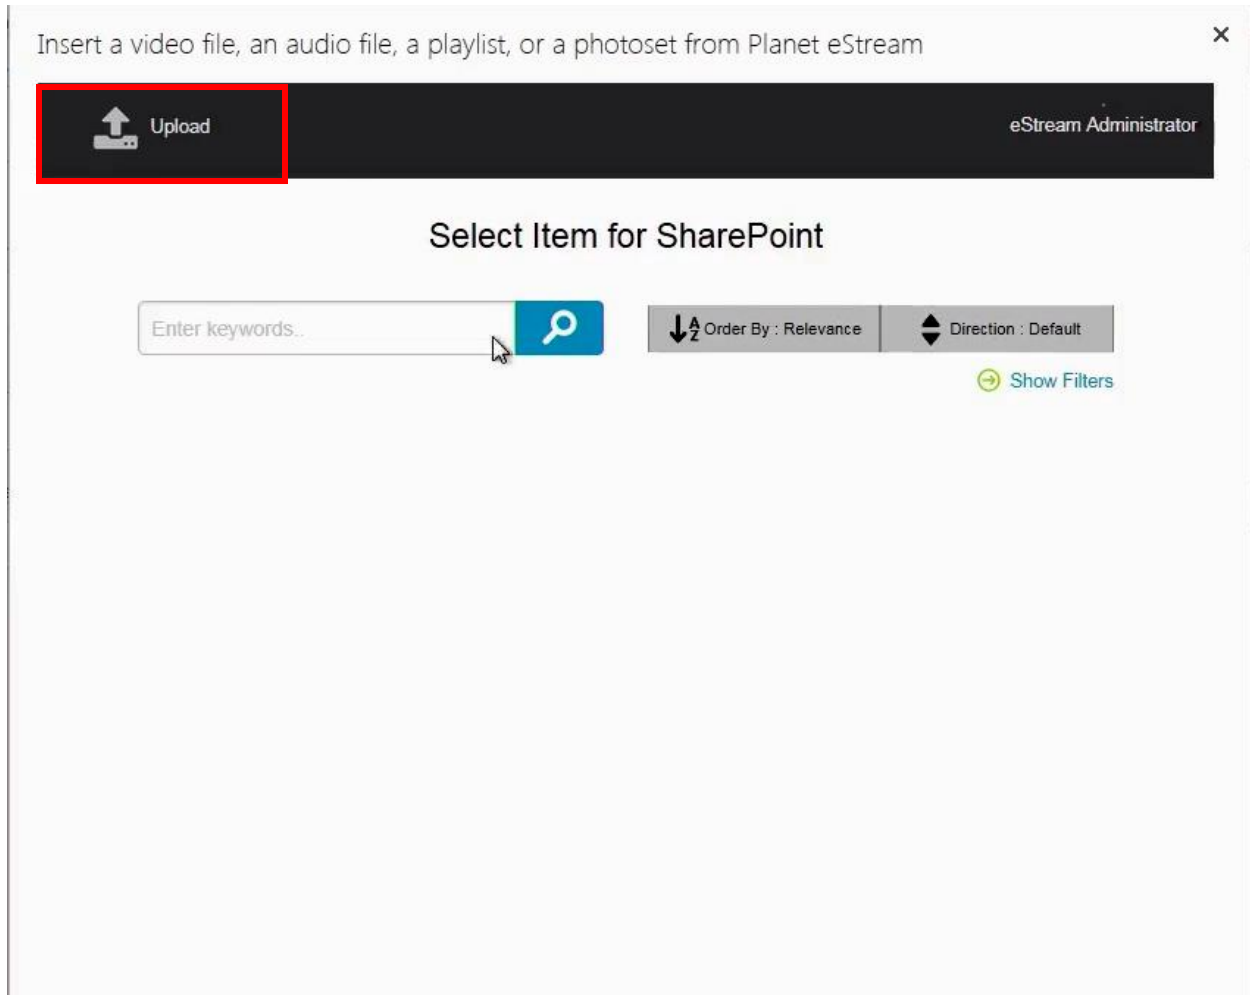

The screenshot shows the SharePoint user interface. At the top, the 'SharePoint' title bar is visible with 'Newsfeed', 'OneDrive', and 'Sites' options. Below this is the ribbon with tabs for 'BROWSE', 'PAGE', 'FORMAT TEXT', and 'INSERT'. The 'INSERT' tab is active, showing a ribbon with groups: 'Table', 'Picture and Audio', 'Media', 'Links', 'Parts', and 'Embed'. The 'Links' group is expanded, and the 'Planet eStream' icon is highlighted. A tooltip for 'Planet eStream' is displayed, stating: 'Planet eStream. Insert a video file, an audio file, a playlist, or a photoset from Planet eStream.' Below the ribbon, the page content area shows a 'Home' section with 'Documents' and 'Site Contents' links. The 'EDIT LINKS' button is visible. The main content area contains a 'Site Feed' section with a 'Newsfeed' heading and a text input field. Below the input field, it says 'It's pretty quiet here. Invite more people to the site, or start a conversation.' To the right, there is a 'Documents' section with a 'new document or drag files here' button and a 'Name' dropdown menu. Below the dropdown, it says 'There are no documents in this view.'

Step 2: Adding content

Next, you will be given two options; you can upload, and you can search.

Upload

If you select **Upload** you will then be able to **Select Files** and upload any local files to your Planet eStream Library. After the video has converted it automatically be embedded on to your SharePoint page. In the interim a placeholder will be displayed.

Searching

You can also search for content that already exists on your Planet eStream site and embed it to a SharePoint page.

Enter your search terms in the search box and all results that match these terms will be returned. You can filter your searches in the usual way.

On the right-hand side of each item you can show Chapters, Preview the Video or select any Quiz Timelines that have been added to the media.

Insert a video file, an audio file, a playlist, or a photoset from Planet eStream ✕

When you select the item to add you can do so with or without details. Details will show the title and description of the piece of media on the video player.

After selecting the media, hit **Save**. The content will be displayed and you can simply press play and watch it back within SharePoint
